- Electromagnetic digitizing technology
- Plug & Play
- Interactive pen with two buttonRF
- Battery Life 40 hrs
- Built in Color LCD
- Electronic Pen with Mouse Emulation (Housed within the pad's body)

Portable Interactive Pad

Globus Interactive Pad Allows You to...

- Up to 50 Interactive Pads can be connected to the single Computer.
- Interact and annotate over your current topics, PowerPoint slides, Web pages or any other computer application - from anywhere in the room!
- Create exciting and engaging topics with the extensive Interactive image gallery and topic resources.
- Keep participants focused on your topic at the front of the room - even have them come up to the Globus Interactive Pad to solve problems interactively.
- Interactive Pad's built-in color LCD screen instantly displays student responses when used with response systems (PRS).
- Save, Print and Email all your topics, notes and files - A great tool for presentation review, participants who are absent or seniors who wish to review what their colleagues are learning.
- Participate in the session where you can join with fellow staff to share topics and activities, learn new ideas on how to use your Interactive Board, download new images and background templates.
- Create a truly dynamic learning environment. When used with other Interactive meeting room products, you engage the participants with the topic and quickly assess their knowledge - connecting with every person so no one is left behind.
- The pen included with the Interactive Pad is rechargeable and can also be used with Interactive Board
- Windows 8 / 7 / Vista / XP / MAC OS and Linux Compatible
